CHEISELLE ANN DELOSO

Software Engineer

Dynamic Software Developer with 8 years of experience specializing in backend architecture and scalable web systems. Expert in modernizing legacy environments, implementing real-time WebSocket services, and leading security initiatives through VAPT. Proven track record of bridging the gap between complex backend logic and seamless user interfaces.

EDUCATION

Bachelor of Science in Information Technology

STI College Global City

2013 - 2017

TECHNICAL CORE

- Languages: **PHP, Javascript HTML, CSS, SQL**
- Frameworks: **Laravel, CodeIgniter, Node.js (ExpressJS, Fastify), ReactJS, Quasar**
- Architecture: **RESTful APIs, WebSockets, Modular Development**
- Databases: **MySQL, MsSQL, PostgreSQL, MongoDB, SQLite, Drizzle ORM,**
- Security & DevOps: **VAPT, GIT, Vitest, SFTP/FTP**

LANGUAGE

- English
- Filipino

EXPERIENCE

Backend Developer

Sept 2025 - Present

GlobalX Digital Corporation

- Architect and maintain WebSocket services to power high-concurrency, real-time application features.
- Refactor critical backend modules to significantly enhance system performance, reliability, and scalability.
- Design and deploy robust RESTful API routes to support complex frontend functionality.
- Collaborate closely with frontend teams to ensure high-efficiency system integration.

Senior Developer II

Feb 2021 - Sept 2025

InterCommerce Network Services, Inc.

- **Modernization**: Championed the adoption of Laravel and Tailwind CSS, streamlining internal development workflows and boosting performance.
- **Security Leadership**: Conducted Vulnerability Assessment and Penetration Testing (VAPT) to ensure enterprise-level application security.
- **Database Management**: Engineered robust data storage and retrieval solutions using MsSQL and MySQL.
- **API Integration**: Facilitated seamless data exchange via SFTP/FTP and RESTful API integrations.
- **Team Collaboration**: Mentored junior staff and collaborated with cross-functional teams to optimize software interfaces.

System Developer

Oct 2020 – Jan 2021

UniQx

- Developed a fully functional e-commerce platform utilizing a modular approach for long-term maintainability.
- Utilized MongoDB and ExpressJS to build flexible, high-performance server-side operations.
- Delivered a responsive UI using the Quasar Framework.

System Developer

Jul 2017 – Jan 2020

Circus International Philippines Inc

- Maintained and enhanced legacy applications, focusing on Object-Oriented (OOP) software solutions.
- Optimized backend communication between APIs and databases to ensure data integrity.
- Identified and resolved complex bugs through comprehensive testing and authored code fixes for future releases.
